

SYED ROHAN ALI SHAH

Full Stack Web Developer

Lahore, Pakistan | +92 319 7136657 | rohanali027@gmail.com | linkedin.com/in/rohan-shah-5402b3206

PROFESSIONAL SUMMARY

Full Stack Web Developer with over 2 years of hands-on experience building responsive, scalable web applications using the MERN stack and modern JavaScript frameworks. Skilled in designing RESTful APIs, optimizing database performance, and translating business requirements into clean, maintainable code. Proven ability to collaborate effectively with designers, stakeholders, and cross-functional teams in Agile environments to deliver projects on time. Strong problem-solving skills with a consistent record of debugging complex issues and improving application performance. Passionate about continuously learning emerging technologies and writing efficient, user-centric software solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Python

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, REST APIs, Postman, VS Code

Other Skills: Problem Solving, Team Collaboration, Communication Skills, Agile Development

WORK EXPERIENCE

Full Stack Web Developer

Jan 2025 - Present (18 Months)

KOT Enterprises

- Designed, developed, and maintained 10+ responsive web applications using React.js, Node.js, and Express.js for diverse business use cases.
- Built and integrated 15+ RESTful APIs with third-party services (payment gateways, email/SMS providers), streamlining workflows and reducing manual processing time by approximately 30%.
- Developed reusable, dynamic frontend components with React.js and Tailwind CSS/Bootstrap, improving UI consistency and cutting development time by roughly 25%.
- Optimized MongoDB and MySQL queries and indexing strategies, improving average application response time by up to 40%.
- Collaborated with designers, project managers, and stakeholders in Agile sprints to deliver 5+ client projects on schedule and within scope.
- Identified and resolved 50+ bugs through systematic debugging and testing, improving application stability and reducing reported issues by roughly 35%.
- Managed version control using Git and GitHub across multiple team projects, including branching strategies and merge conflict resolution.
- Participated in peer code reviews and enforced coding best practices, improving overall code quality and maintainability.

Junior Web Developer Intern

Jan 2024 - Dec 2024 (1 Year)

KOT Enterprises

- Assisted senior developers in the development and maintenance of 5+ client websites, gaining hands-on exposure to the MERN stack.

- Learned and applied MongoDB, Express.js, React.js, and Node.js to build functional web modules under mentorship.
- Identified and resolved UI/UX issues across multiple projects, improving usability and visual consistency.
- Supported senior developers with feature development, testing, and deployment tasks.
- Wrote clean, reusable, and well-documented code in line with team coding standards.

PROJECTS

E-Commerce Web Application

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, REST APIs

- Built a full-featured e-commerce platform with user authentication, product catalog, shopping cart, and order management.
- Key Features: Secure JWT-based authentication and role-based access, admin dashboard for inventory and order tracking, responsive design across devices, product search and filtering, and integrated payment gateway.
- Impact: Reduced average page load time by 35% through code-splitting and image optimization, and supported a fully responsive checkout flow tested across multiple devices and browsers.

Real-Time Task Management Dashboard

React.js, Node.js, Express.js, MongoDB, Socket.io

- Developed a collaborative task and project management tool with real-time updates for distributed teams.
- Key Features: Drag-and-drop Kanban board, role-based task assignment, real-time notifications via WebSockets, and activity logging.
- Impact: Enabled real-time collaboration for teams of 5-10 users, reducing task status update delays from manual check-ins to instant sync, improving team coordination.

Inventory & Sales Management System

Python, Flask, MySQL, Bootstrap

- Built a web-based inventory and sales tracking system for small businesses to manage stock levels, sales records, and reporting.
- Key Features: Real-time stock level tracking, automated low-stock alerts, sales analytics dashboard, and exportable reports.
- Impact: Reduced manual inventory tracking effort by an estimated 40% and minimized stock discrepancies through automated alerts.

EDUCATION

Associate Degree in Computer Science

2024 - 2026 (In Progress)

University of the Punjab

Intermediate in Computer Science (ICS)

Completed 2024

KIPS College

CERTIFICATIONS

- Full Stack Development Course - NAVTTC (2025)

LANGUAGES

English (Fluent) | Urdu (Native)
